## STUDY AND RESEARCH ACTIVITIES

**1998** - I am part of the Technical Group for the feasibility study of the "International Park of Thermalism" in Rapolano Terme (Si) - stakeholders: Tuscany Region, Municipalities of Rapolano, Asciano, Castelnuovo Berardenga and Sinalunga, Terme Antica Querciolaia.

**1996/1997** - Ministry of Cultural and Environmental Heritage- Superintendence of Environmental and Architectural Heritage for the Provinces of Siena and Grosseto (1996-1997) - Research Assignment Cataloging, editing and computerization of 120 files related to Architectural Heritage falling in the municipality of Colle di val d'Elsa.

## TEACHING ACTIVITIES

**from 2012 to present** - Consulting and Training on "BIM " (Building Information Modeling) and "REVIT" (Autodesk) for Architects, Engineering Companies and professionals in the construction industry at the studio or, in the applicants' office;

**2019/2020** - Lecturer 36-hour Training Courses "BIM what is it" and "BIM with REVIT " on "BIM" (Building Information Modeling) and "REVIT" (Autodesk) at SCUOLA EDILE in Grosseto, for professionals with Tuscany Region Voucher, under and over 40 years old and employees of Public Administrations;

**2018/ 2019** - Lecturer 36-hour "BIM what is it" training courses on "BIM" (Building Information Modeling) and "REVIT" (Autodesk) at Bluinfo Formazione sas in Siena, Italy, for professionals with Tuscany Region Voucher, under and over 40 years old;

**2015/2019** - Accredited Lecturer at the Orders of Architects PPC of Grosseto and of Siena for the Courses of Professional Training "*BIM what is it*" and "*BIM with REVIT*".

**2015/2016** - Lecturer commissioned by "Aruspice Associazione per l'Alta Formazione" within the project "RESTRUCTURING - Program of productive reconversion in the Tuscan construction sector Innovation Actions" for Vocational Training Courses at Scuola Edile of Siena, Arezzo and Grosseto of the module: "*The management and development of innovation in construction companies: the BIM*"

**1997/1998** - Assistant Professor of Exhibit Design and Museography (3rd year), topic : "*The Displaced Museum*" - Project for a Museum in the City.

**1996/1997** - Assistant in the course of Urban Design (5th year ) and the course of Exhibit Design and Museography (3rd year), theme : "*The Great Uffizi*" - Project for a Museum of the City.

**1995/1996** - Assistant in the course of Urban Design (5th year ) and the course of Exhibit Design and Museography (3rd year), theme : "*The Great Uffizi*" - Project for a Contemporary Museum.

A new Convention is entered into between the City of Colle Val d' Elsa and the Department of Architecture Design for the study and design of a " Contemporary Urban Park" in the valley of St. Augustine.

Four groups of undergraduates are working on this project, on whose thesis I am co-author.

**1994/1995** - Assistant Professor of Urban Design (5th year ), topic : "*The Great Uffizi*" - New exhibition and museum spaces in Florence.

**1993/1994** - Assistant Professor of Urban Design (4th year ), topic : "*Museum of Natural Sciences in the former - Slaughterhouse area "* in Florence.

**1992/1993** - Assistant Professor of Urban Design (5th year ), topic : "*Design for the new Bauhaus in Dessau, Germany.*"

**1991/1992** - Assistant Professor of Integral Design ( 5th year ), theme : "*The redesign of the suburbs "* in Colle Val d'Elsa.

I conduct together with arch. Furiozzi communications to students of a theoretical nature and follow the activity of the research seminar.

A Convention is signed between the Municipality of Colle Val d' Elsa and the Department of Planning of the Faculty of Architecture of Florence, scientific head Prof. Breschi, co-responsible for the research the undersigned and arch. L. Furiozzi, on the theme : "*The redesign of the suburbs*" Feasibility projects for the drafting of a Detailed Plan for the new road axis between Via Gramsci and Via Diaz.

**since 1990** - After the Graduate Thesis with Prof. Breschi I am his assistant -subject instructor in the Integral Design Course (4th year). Course theme:

" A Door for Firenze " seminar on the recovery of the former Franks workshops.

I collaborate on writing course syllabi, coordinate research seminars on topics such as redevelopment of " weak" urban areas, supervise student design exercises, and participate in examination/graduation committees.

**ORGANIZATION**

Architect DANIELE RAVAGNI has developed over the years a working method and a system of Integrated Design in association or collaboration with architects, engineers, surveyors, geologists and agronomists in which each one realizes the parts best suited to his experience and specificity always having full knowledge of the whole project. This allows for a more streamlined and flexible organization and optimized management of the firm, which in fact is formed on a project-by-project basis according to particular needs. Today it is even easier thanks to the use and sharing of modern information technologies based on BIM that make it possible to work on the same project while being in different places, spaces and times.

Projects are designed and developed by Architect DANIELE RAVAGNI, in close relationship with other associated or collaborating professionals, with working meetings at the studio or on site.

DANIELE RAVAGNI, assisted by a project manager appointed from time to time, controls the development of the project from the point of view of design in all its phases. Associated professionals (RTP) or collaborators participate in the design and are responsible for producing the documents necessary for the execution of the assignment and coordinating with specialists (of supplies, IT services, etc.).

The professional skills and project and planning phases are broken down into precise parts, which allows everyone to know exactly their part of the work and the relative level of responsibility that participation in an integrated form transforms into added value to the project.

The strength that results from this organizational model is the team's continuous and renewed interest in the project, and the willingness and determination of each of the team members, the multiple and diverse professional experiences of the designers, each in his or her own field, are the determining factors for a complete success of the project in the spirit of the proposal, whether architectural or urban planning.

We work for eco-friendly Architecture with the use of Renewable Energy on LEED and/or ClimateHouse standards.

**Subscription programs :** no.1 REVIT AEC 2024 Collection + no.1 REVIT Architecture 2012

**Equipment :** Xeon workstation, i7, Ryzen 7 and Ryzen 5 laptop PCs, A/3+ color printer, A/3 b/w laser printer.
